Marren C.N., Aronstam R.S., Sharma S.V.;

"cDNA clones of human proteins involved in signal transduction
sequenced by the Guthrie cDNA resource center (www.cdna.org).";

Submitted (APR-2003) to the EMBL/GenBank/DDBJ databases.

-!- FUNCTION: Orphan receptor.

-!- FUNCTION: Orphan receptor.

-!- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).

-!- SUBCELCULAR LOCATION: Integral membrane protein (By similarity).

-!- SUBCIFICITY: Expressed in all adult and fetal tissues
examined, including pancreatic isslets and skeletal muscle, with
relatively higher levels in adult lung, small intestine, colon and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             and mouse cDNA sequences",
Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).
-- FUNCTION: Orphan receptor.
-- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).
-- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                                                                                                                                NUCLEOTIDE SEQUENCE.

Inoue S., Yoshida S., Urakawa I., Mizutani S., Okazaki H.;
Inoue S., Yoshida S., Urakawa I., Mizutani S., Okazaki H.;
Submitted (APR-2000) to the EMBL/GenBank/DDBJ databases.
--- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).
--- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
EMBL, AB041940; BAD835941; -; mRNA.

-!- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).
-!- SUBCELLULAR ENGRANCY.
-!- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.

Generation and initial analysis of more than 15,000 full-length human This Swiss-Prot entry is copyright. It is produced through a collaboration between the Swiss Institute of Bioinformatics and the EMBL outstation-the Buropean Bioinformatics Institute. There are no restrictions on its use as long as its content is in no way modified and this statement is not hippocampus. SIMILARITY: Belongs to the G-protein coupled receptor 1 family. Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903 (2002).
-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- TISSUE SPECIFICITY: Not detected in the brain regions thalamus, putamen, caudate, frontal cortex, pons, hypothalamus and PROSITE; PS00237; G_PROTEIN RECEP_F1_1; 1.

New human G-protein coupled receptor (GPCR), useful for screening agonist or inverse agonist compounds for treating diseases associated with GPCR. N-PSDB; ABS73401

Example 2; Page 189-190; 201pp; English.

The present invention relates to transmembrane receptors, particularly endogenous human G-protein coupled receptors (GPCRs), mutant (non-endogenous) versions of the GPCRs, and the polymuclectide sequences encoding them. The GPCRs are useful for screening agonist or inverse agonist compounds for treating diseases associated with GPCR. Diseases that can be treated with such compounds include allergies, hypertension,

The present sequence is that of the human gene encoding G protein coupled receptor, GPR35 as deduced from a composite CDNA (see AAA27485). The sequence of GPR35 as deduced from a composite CDNA (see AAA27485). The sequence of GPR35 is similar to that of a putative purinoceptor P279 (34.1% identity) suggesting that ATP or other nuclectide is its ligand. GPR35 mRNA was detected in all adult and foetal tissues examined with relatively higher levels in adult lung, snall intestine, colon and camach. In these tissues, there are 2 major transcripts of 2.4 and 4.4 kb, whereas in skeletal muscle there is a single transcript of 9.4 kb. The GRSS gene is located in a 49,136 bp region (see AAA2745) within the CNIDDAI region of human chromosome 2. This region also includes the CAPN10 gene, which encodes a novel calpain-like cysteine protease, designated calpain 10. Mutations in the CAPN10 gene are responsible for a usecptibility to type 2 diabetes. Claimed methods for screening for a compensity for type 2 diabetes mellitus are based on detection of a polymorphism in a calpain encoding nucleic acid. Methods are also claimed for identifying modulators of calpain activity, and using these contains to treat diabetes, in particular through the regulation of an insulin secretory response or insulin mediated glucose transport
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            181 YLPLAVVVPCSLKVVTALAQRPPTDVGQAEATRKÄKRÅVWANLLVFVVCFLPLHVGLTVR 240

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           240
                                                                                                                                                                                                                                                                                                                                                    , human G-protein coupled receptor (GPCR), useful for screening agonist inverse agonist compounds for treating diseases associated with GPCR.
                                                                                                                                                                                                                                                                                                                                                                                                                                                 endogenous human G-protein coupled receptors (GPCRs), mutant (non-endogenous) versions of the GPCRs, and the polynucleotide sequences encoding them. The GPCRs are useful for screening agonist or inverse agonist compounds for treating classes associated with GPCR. Diseases that can be treated with such compounds include allergies, hypertension, reflux disease, depression, migraine, schizophrenia, ulcers, psychotic disorders, asthma, bronchospasm, anaesthesia, myocardial infarction (MI) stroke, glaucoma, prostatic hyperplasia, epilepsy, prostate cancer, anxiety, prostatic hypertrophy, rhinitis, and angina. The present invention describes antigenic peptides (I) comprising: (a) any one of 1601 sequences (see ABP82019 to ABP83619) of 12-24 amino cardids. Also described: (1) an assay for the detection of a particular GCC acids. Also described: (1) an assay for the detection of a particular GCC and (2) an isolated antibody having high specificity and high affinity or aridity for a particular GPCR. (I) can be used as GPCR modulators and in gene therapy. The antigenic peptides for GPCRs are useful in detecting an antibody against a particular GPCR. and in the production of specific antibody against a particular GPCR. and in the production of specific antibody against a particular GPCR. and in the production of specific cartibods and antibodies and antibodies are also useful for disposing and designing the presence or absence of corresponding GPCRs. The antigenic peptides for GPCRs and antibodies are useful for disposing and designing drugs for treating immune-related diseases, immunological-related cell proliferative ciseases, or autoimmune diseases, growth-related diseases, concertions, allergies, bacterial, fungal, protozoan or viral infections, atherosclerosis, bacterial, fungal, protozoan or viral infections, concertions and acute inflammation, allergies, Crohm's disease, glabetes, graft versus host disease, parkinson's disease, multiple sclerosis, pain, psoriasis, concertions and scute concernation, renal disorders, rheumatoid arthritis, trauma, ulcers, or hypotension, renal disorders, rheumatoid arthritis, trauma, ulcers, or any other disorders, rheumatoid arthritis, trauma, ulcers, or any other disorders, rheumatoid arthritis, trauma, ulcers, or any other disorders, rheumatoid arthritis, the angely of the and the disorders and acute involved. The antibodies may be and the disorders and acute involved. The antibodies may be and the disorders and acute involved. The antibodies and part of the actions of the actions of the actions of the actions of the and provides.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New isolated antigenic peptides e.g., for G protein-coupled receptors (GPCR), useful for diagnosing and designing drugs for treating conditions in which GPCRs are involved, e.g. AIDS, Alzheimer's disease, cancer or
                                                                                                                                                                                       G protein-coupled receptor; GPCR; antigenic peptide; gene therapy; grotein-coupled receptor modulator; antibody; immune-related disease; growth-related disease; cell regeneration-related disease; AIDS; cancer; immunological-related cell proliferative disease; autoimmune disease; Altaeimer's disease; atherosclerosis; infection; osteoarthritis; allergy; osteoporosis; cardiomyopathy; inflammation; Crohn's disease; diabetes; graft versus host disease; Parkinson's disease; multiple sclerosis; pain; paoriasis; anxiety; depressaon; schizophremia; dementia; memory loss; mental retardation; epilepsy; asthma; tuberculosis; obesity; nausea; hypertension; hypotension; renal disorder; rheumatoid arthritis; tramma;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        used in immunoassays and immunodiagnosis. ABZ42523 to ABZ42869 encode GPCR proteins given in ABP81675 to ABP82018, which are used in the
                                                                                                                                                                                    protein-coupled receptor; GPCR; antigenic peptide; gene therapy;
                                                                                                                                Human G protein-coupled receptor GPR35 protein SEQ ID NO:492
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Disclosure; Fig 1; 523pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        (LIFE-) LIFESPAN BIOSCIENCES INC.

The proteins and genes are useful for diagnosis, treatment and prevention of heart failure.

Query Match

Novel mammalian G protein coupled receptors, useful for identifying compounds that modulates diagnosing and treating disease condition associated with GPCR dysfunction e.g. autoimmune diseases, angina pectoris, Parkinson's disease.

(first entry)

26-AUG-2004

ADO78094;

Claim 151; SEQ ID NO 496; 542pp; English

The invention relates to human and mouse G protein-coupled receptors (GPCRs) and nucleic acids encoding them. The invention also relates to sequences at least 90% identical to the GPCR proteins and nucleic acids of sequences at least 90% identical to the GPCR proteins and nucleic acids of sequences at least 90% identical to the GPCR proteins and nucleic acids of associated with GPCRs of the invention; methods of screening for associated with GPCRs of the invention or a comprising a GPCR gene of the invention is a mouse comprising a GPCR gene of the invention and second which has transgene or in an endogenous GPCR gene; cells derived from the trasngenic mice; kits comprising several mice, each of which has comprising a GPCR gene of the invention and kits comprising comprising a GPCR gene of the invention. The comprising a GPCR nucleic acids and proteins may comprising a conformation of a disease or schizophrenia; alsorders of the adrenal gland; disorders (e.g., Alzheimer's disease, disease, disease or schizophrenia; comporation, diabetic neuropathy, Parkinson's disease or schizophrenia; comporated infraction); muscular disorders (e.g., angina, cardiac arrhythmia or mycardial infraction); muscular disorders (e.g., angina, cardiac arrhythmia or comporated infraction); muscular disorders (e.g., auchimmune disorders) and disorders of the kidney, liver, lung, broaste, over, or the primee appe electronic format directly from WIPO at frp.wipo.int/pub/published_pct_sequences.

agent that inhibits the expression or activity of a tumour-associated antigen (TAG) that is encoded by a nucleic acid. The pharmaceutical compositions and related compositions, are used for treatment of diseases associated with (abnormal) expression of TAG, specifically cancer e.g. of lung, breast, prostate, colon, stomach, pancreas, ear/nose/throat, kidney or cervix, also melanoma. Compositions containing TAG, or related nucleic acid, antibodies or host cells, are also useful for diagnosis and sequence of a human GPR35. tumour-associated antigen; TAg; cancer; lung cancer; breast cancer; prostate cancer; colon cancer; stomach cancer; pancreatic cancer; ear cancer; nose cancer; throat cancer; kidney cancer; cervical cancer; melanoma; tumour; human; GPR35. Composition containing inhibitor of expression or activity of specific tumor-associated antigens, useful for treating cancers, also related compositions for diagnosis and monitoring. The invention relates to pharmaceutical compositions that comprise an Claim 72; SEQ ID NO 9; 124pp; German Koslowski M; 22-NOV-2002; 2002DE-01054601. 22-NOV-2002; 2002DE-01054601 (GANY-) GANYMED PHARM Sahin U, WPI; 2004-421820/40.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention relates to an antibody immunospecifically binds to p-cadherin or its fragment. The antibody is useful in preparing a composition for treating or preventing a cancer-associated disorder. The present sequence represents the amno acid sequence of a protein upregulated in human colon cancer cells.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     9
                                                                                                                                                                                                                                                                                                                                                                                                                                                         New antibody that immunospecifically binds to p-cadherin, useful in preparing a composition for treating or preventing a cancer-associated disorder.

The invention relates to the use of human G-protein coupled receptor 35 (GPR35) for screening therapeutic agents useful in the treatment of cardiovascular disorders, liver and gastrointestinal diseases, cancer disorders, inflammatory diseases, metabolic diseases, hematological disorders, in a mammal. GPR35 is a G-protein coupled receptor (GPCR). The disorders, in a mammal. GPR35 is a G-protein coupled receptor (GPCR). The therapeutic agents are screened by contacting a test compound with GPR35 polymetried, and detecting the binding of the test compound with GPR35 polymetried diseases in a mammal, comprising determining the amount of the GR835 polymuclectide in a sample taken from the mammal, and determining the amount of the GR835 polymuclectide in healthy and/or diseased mammals (C GR835 polymetried). Or or treating the above specified diseases in the mammal, comprising a therapeutic agent that binds to the GR835 polymetried; 30 use of regulators of a GR835 for the preparation of the pharmaceutical composition or for the regulation of GR835 regulator, determining whether the regulation amount of the pharmaceutical composition or for the regulator ameliorates the compliance of the above specified diseases; and (4) a method for the symptoms of the above specified diseases; and combining the regulator with an acceptable pharmaceutical composition; comprising useful for symptoms of the above specified diseases in a mammal, and combining the regulator with an acceptable pharmaceutical cardiovascular disorders, liver and gastrointestinal diseases, cancer disorders, inflammatory diseases, and agastrointestinal diseases, cancer disorders, inflammatory diseases, metabolic diseases, hematological disorders in a mammal, e.g. humans (preferably), dogs, cats, cows, horses, rabbite, and monkeys. This sequence represents human GPR35.
                                                                                                                                                                                                                                                                                                                                               G-protein coupled receptor 35; GPR35; G-protein coupled receptor; GPCR; screaning; cardiovascular disease; gastrointestinal disease; liver disease; cancer; neoplasm; metabolic disorder; hematological disease; respiratory disease; inflammation; hematological disease; respiratory disease; inflammation; gastrointestinal-gen.; hepatotropic; cardiovascular-gen.; respiratory-gen.; espiratory-gen.; espiratory-gen.; respiratory-gen.; hepatotropic; cytostatic; metabolic; antianemic; respiratory-gen.; antiinflammatory; neuroprotective; uropathic; receptor.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Screening of therapeutic agents useful in treating specified diseases involves contacting test compound with G-protein coupled receptor GPR35, and detect binding of test compound to polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Ξ

The present sequence is human receptor-associated protein (HRAP) from Incyte clone 3083742 obtained from OVARTUNO1 cDNA library. This sequence is expressed in haemacropoietic/immune, gastrointestinal and reproductive tissues. HRAP has cytostatic, immunomodulatory, antianflammatory, cardiant, antiarteriosclerotic, hepatotropic, antiantemic, antiantentic, antiantemic, antiantemic, antiantemic, antiantemic, antiantemic, antiantemic, antiantemic, autidiapetic, dematological and neuroprotective activities. The present sequence is useful in the diagnosis, treatment and prevention of disorders associated with HRAP expression, especially cell proliferative, autoimmune/inflammatory, reproductive, cardiovascular and gastrointestinal disorders (e.g. atherosclerosis, cirrhosis, leukaemia, cancer, AIDS, arthritis, allergies, anaemia, asthma, dermatitis, diabetes, osteoporosis, multiple sclerosis and irritable bowel syndrome)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        PLRARGLRSPRQAAAVCAVLWVLVIGSLVARWLLGIQEGGFCFRSTRHNFNSMRFPLLGF 180
